PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience building web applications using React.js, Node.js, NestJS, TypeScript, and PostgreSQL. Experienced in developing responsive user interfaces, designing RESTful APIs, implementing authentication and authorization, and integrating third-party services. Strong understanding of frontend and backend development with hands-on experience delivering production-ready applications. Familiar with AWS services including Lambda, S3, API Gateway, and CloudWatch.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, Nest.js, RESTful API Design, Serverless Architecture

Database: MongoDB, PostgreSQL, Firestore, TypeORM

Cloud & DevOps: AWS Lambda, Amazon API Gateway, Amazon S3, Amazon CloudWatch, AWS SAM

AI / ML: Amazon Bedrock (Generative AI), Retrieval-Augmented Generation (RAG), Vector Embedding, Semantic Search, Knowledge Bases

Tools & Practices: Git, GitHub, Axios, Postman, Google Maps API, JWT Authentication

PROFESSIONAL EXPERIENCE

Junior Software Engineer, Geesesquads Software Service Pvt. Ltd.

Aug 2025 – Present

- Developed responsive React.js applications and reusable UI components, improving user experience and application maintainability.
- Built full-stack features using **React.js**, **Node.js**, and **NestJS**, including API integration and state management.
- Designed and implemented scalable REST APIs using NestJS and Node.js, enabling efficient integration across multiple application modules.
- Integrated Google Maps features for location pinning, map visualization, and geolocation-based functionality.
- Implemented real-time features and cloud-based data management using **Firebase**.
- Consumed and integrated third-party APIs to enhance application functionality.
- Developed and maintained serverless applications using **AWS Lambda** and API Gateway.
- Integrated **Amazon Bedrock** for AI-powered assistants, knowledge retrieval, and conversational AI features.
- Implemented **RAG** (Retrieval-Augmented Generation) solutions using embeddings, vector search, and **knowledge bases**.
- Managed file storage and document processing workflows using **Amazon S3**.
- Monitored, debugged, and optimized cloud applications using **Amazon CloudWatch**.
- Collaborated across frontend, backend, AI, and cloud infrastructure to deliver end-to-end solutions.

INTERNSHIP

Software Developer Intern,

Mar 2025 – Aug 2025

Geesesquads Software Service Pvt. Ltd.

- Assisted in developing full-stack web applications using React.js, Node.js.
- Built and integrated RESTful APIs and database operations using PostgreSQL and Firebase.
- Participated in debugging, testing, and optimizing application performance.
- Collaborated with team members using Git and Agile development practices.
- Gained hands-on experience in software development.

Technologies : MongoDB, Express.js, React.js, Node.js

- Completed intensive training in MERN Stack development with hands-on experience in building full-stack web applications.
- Developed responsive frontend interfaces using React.js and integrated RESTful APIs with backend services.
- Built server-side applications using Node.js and Express.js and managed data storage with MongoDB.
- Implemented authentication, CRUD operations, and database-driven features through real-world projects.
- Utilized Git and GitHub for version control and collaborative development workflows.

KEY PROJECTS

Field Pulse - Canvassing & Voter Management Platform,

React, TypeScript, Tailwind CSS, NestJS, TypeORM, PostgreSQL, Google Maps API, JWT

- Collaborated in a team environment to build and maintain a full-stack canvassing and voter-management platform.
- Led backend-heavy development across multiple modules, with key contributions to Persons, Household, and Analytics domains.
- Designed and implemented REST APIs, service logic, and database operations using NestJS, TypeORM, and PostgreSQL.
- Integrated backend services with React frontend flows to deliver complete, production-ready features.
- Built map-integrated functionality using Google Maps API to support location-based canvassing workflows.
- Followed engineering best practices with TypeScript standards, linting/formatting, and maintainable modular architecture.

CareerHive - Job Portal, React.js, Javascript, Express.js, Node.js, MongoDB

- Developed a full-stack job portal with separate candidate and recruiter dashboards using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication and role-based access control for secure candidate and recruiter access.
- Built features for candidates to browse job listings, view job details, apply for jobs, and track application status through a personalized profile dashboard.
- Developed recruiter functionalities to create company profiles, post job openings, and manage job listings.
- Created application management workflows enabling recruiters to view applicants and update candidate statuses throughout the hiring process.
- Designed and integrated RESTful APIs and optimized MongoDB schemas for efficient handling of users, jobs, companies, and applications.

AI-Powered Assistant for Asset Management,

React, TypeScript, Amazon Bedrock, AWS S3, Knowledge Base, Streaming Respons

- Integrated an AI assistant into the asset management platform using Amazon Bedrock for generative AI inference.
- Built a Knowledge Base-driven retrieval flow (RAG-style) to provide context-aware answers from domain documents instead of generic responses.
- Used Amazon S3 as the document source layer for knowledge assets, enabling organized storage and retrieval for AI grounding.
- Implemented streaming AI responses in the frontend to deliver token-by-token output for faster, more interactive user experience.
- Added robust handling for prompt validation, fallback behavior, and error states to ensure reliable AI interactions in production.

EDUCATION

BTech, APJ Abdul Kalam Technological University

2024

CGPA : 8.27

Higher secondary, MSM Higher Secondary School

2020

91.5%

SSLC, MSM Higher Secondary School

2018

95%
